

Reduce, reuse and recycle (3R)

**REDUCE
REUSE
RECYCLE**

REDUCE

- Reduce: making something smaller or using less, results in a smaller amount of waste
- You can reduce the amount of waste you produce by choosing the rubbish you throw away. This can be easy and fun, just follow the simple guidelines to reduce your waste at home

REUSE

- Reuse: to use again or more than once
- Reuse materials so that they have a longer life and don't get thrown away after the first use
- Before you throw away those materials, think about how they can be reused

RECYCLE

Recycling puts the materials through a process that allows them to be used again. There are a lot of benefits of recycle, for example:

- Recycling prevents pollution
- Recycling saves energy
- Recycling helps sustain the enviroment for future generations

**KEEP
CALM
AND
RECYCLE
MORE**

WHAT IS POLLUTION?

Pollution is when harmful substances contaminate the environment.

Pollution is the result of very bad condition of environment in terms of quantity and quality.

WHICH **EARTH** DO YOU WANT TO LIVE IN?

Copyright © Penang Butterfly Farm

There are 5 types of pollution:

- Water pollution
- Air pollution
- Land pollution
- Noise pollution
- Radio active pollution

HOW CAN WE HELP?

- By learning the 3 R's
- Practicing all 3 activities every day
- Buying products with a recyclable packaging
